This listing of claims replaces all prior versions, and listings of claims in the instant application:

## Listing of Claims:

- (original) An electronic component package comprising:
  - a substrate comprising:
    - a first surface;
    - a second surface;
    - a side; and
  - a ground shield extending from said first surface to said second surface and adjacent said side; and an electronic component coupled to said first surface.
- 2. (original) The electronic component package of Claim 1 wherein said ground shield comprises a plurality of electrically conductive ground vias.
- 3. (Previously presented) The electronic component package of Claim 2 wherein said ground vias are spaced sufficiently close to one another to prevent radiation from passing between said ground vias.
- 4. (original) The electronic component package of Claim 1 wherein said ground shield extends around a periphery of said substrate.
- 5. (original) The electronic component package of Claim 1 further comprising a shield ring coupled to said first surface of said substrate, said shield ring defining a central region of said first surface of said substrate, said electronic component being coupled to said central region.
- 6. (original) The electronic component package of Claim 5 wherein said shield ring comprises upper ground traces.

- 7. (original) The electronic component package of Claim 6 wherein said upper ground traces are adjacent said side of said substrate.
- 8. (original) The electronic component package of Claim 6 further comprising a shield electrically coupled to said shield ring, said shield enclosing said electronic component.
- 9. (original) The electronic component package of Claim 8 wherein said shield comprises a shield connection surface, said electronic component package further comprising an electrically conductive adhesive coupling said shield connection surface to said shield ring.
- 10. (original) An electronic component package comprising:
- a substrate comprising a first surface comprising a central region defined by a shield ring;
- a shield electrically coupled to said shield ring, said shield being continuous; and

an electronic component coupled to said central region.

- 11. (original) The electronic component package of Claim 10 wherein said shield comprises a shield connection surface, said shield ring corresponding in shape to said shield connection surface.
- 12. (original) The electronic component package of Claim 11 wherein said shield connection surface comprises a rectangular annulus.

## 13-23. (canceled)

24. (Withdrawn) The An electronic component package of Claim 10 wherein said central region is a first central region, said shield ring is a first shield ring, said shield

is a first shield, and said electronic component is a first electronic component, said electronic component package further comprising:

- a substrate comprising a first surface;
- a first shield ring defining a first central region of said first surface of said substrate;
- a second shield ring defining a second central region of said first surface of said substrate;
- a first electronic component coupled to said first central region;
- a second electronic component coupled to said second central region;
- a first shield enclosing said first electronic component, said first shield being electrically coupled to said first shield ring; and
- a second shield enclosing said second electronic component, said second shield being electrically coupled to said second shield ring.
- 25. (Withdrawn) The electronic component package of Claim 24 wherein said first electronic component is shielded from said second electronic component by said first shield and said second shield.
- 26. (Withdrawn) The electronic component package of Claim 24 wherein said first shield is grounded separately from said second shield.
- 27. (Withdrawn) The electronic component package of Claim 24 wherein said first shield and said second shield are commonly grounded.
- 28. (Withdrawn) The electronic component package of Claim 27 wherein said first shield is electrically coupled to said second shield.
